*Masonry Concepts, Inc.  
Santa Fe Springs, CA*

### Masonry Material

*Angelus Block Company, Inc.*

### Square Feet of Masonry

*22,000 Sq. Ft.*

### Cost of Masonry

*\$600,000*

### Number of Stories

*1*

The Monarch Athletic Center is the focal point of the Los Angeles Valley College campus and the use of concrete masonry units was a logical choice for the design of the athletic facility.

Concrete block was essential to the success of this building as it functions as both external and internal finish materials, thereby saving construction costs, while providing style and durability.

Various contrasting earth-tone colors provide a blend of masonry wall finishes. The color contrast is further enhanced by texture variations that includes marigold split face, loadbearing gray precision, multiple score split face and glass block.

Once again, an institute of higher education chose masonry in recognition of appealing appearance, long-term durability and reduced maintenance cost over the life of the facility.

Construction by a signatory masonry contractor using members of Bricklayers & Allied Craftsman Union Locals
